

Surgical Supplies

Coverage and Payment Policy

Surgical supplies are covered for beneficiaries who require home treatment of a specific medical condition, protection or support of a wound, surgical incision or diseased or injured body part.

A certificate of medical necessity (CMN) must be on file for all supplies requested by the physician and it must indicate the duration of therapy. If the therapy is long term, an updated CMN must be on file every year.

If prescribed supplies exceed the stated policy allowance, prior authorization is required.
