

WellOne is happy to announce that we are now providing dental services in nursing homes to any resident who wishes to enroll.

Our team of professional dental practitioners consisting of dentists, dental hygienists and dental assistants, provide diagnostic, preventative, palliative and restorative services that include:

Emergency, Comprehensive, and Yearly Exams
State-of-the-Art Digital X-rays
Dental Cleanings
Denture Relines and Repairs
New Dentures

These services are provided in the nursing home in which a member resides through the use of mobile dental equipment at no cost to the facility. WellOne provides other dental services, such as fillings and extractions, at any of our three locations:

36 Bridge Way, Pascoag RI 02859	401.567.0800
142A Danielson Pike, Foster RI 02825	401.647.3702
308 Callahan Road, N. Kingstown RI 02852	401.295.9706

Residents of nursing homes contracted with WellOne become eligible for participation after they have resided in the facility for 45 days and may enroll in the program by completing a Dental Services Authorization form and returning it to the facility.

WellOne accepts Medicaid and most third party insurers that offer a dental rider. The program also accepts payment from private pay patients.

Please call us for more information at 401.567.0800 or browse our website below.
