

(1=low 5=high)

	Proposed WORKFORCE Strategy	Importance (1-5)	Feasibility (1-5)	How can this be accomplished? (eg, resources, policies, curricula, partners)	Potential barriers	Possible solutions
1	Expand clinical practicum opportunities that focus on populations with chronic illnesses - including physical and behavioral.					
2	Standardize core competencies across entry-level caregiver occupations, including awareness of chronic diseases and social determinants of health					
3	Develop advancement opportunities for entry-level caregivers to obtain certification in chronic diseases (eg, asthma, tobacco, diabetes)					
4	Clarify / differentiate role of entry-level and licensed caregivers regarding chronic disease management					
5	Utilize telehealth to expand access to home-based care for chronic disease.					
6	Expand access to home-based care for chronically ill via alternative workforce (eg, EMT/Paramedics, CHWs, etc)					
7	Train/support BH professionals to work with patients on co-occurring physical/behavioral chronic illness.
